

PRODUCT	DESCRIPTION
 <p>OMNIGUIDE® FLEXIBLE FIBER CO₂ LASER</p>	<p>Primarily used during a stapedectomy, mastoidectomy, laryngoscopy, bronchoscopy, glossectomy or acoustic neuroma treatment</p> <ul style="list-style-type: none"> • Revolutionary CO₂ flexible fiber technology • Precision tissue cutting, coagulation and ablative surgical energy for procedures involving work around delicate anatomy • Safe, predictable and reliable energy control in an easy-to-use robotic FlexGuide™, endoscopic or microsurgical hand piece
 <p>DEKA® SMARTXIDE CO₂ HI-SCAN</p>	<p>Primarily used during a stapedectomy, mastoidectomy, laryngoscopy or glossectomy</p> <ul style="list-style-type: none"> • Combines its CO₂ laser with an EasySpot™ micromanipulator scanner for computerized laryngeal surgery • Adjusts the energy density and dwell time of each single spot on tissue • Hi-Scan computer controls the ablation spot size, depth and percentage of coagulation during cutting
 <p>COHERENT, LUMENIS, ULTRAPULSE® CO₂ LASER SYSTEMS</p>	<p>Primarily used during a stapedectomy, mastoidectomy, bronchoscopy, laryngoscopy, bronchoscopy, glossectomy or acoustic neuroma treatment</p> <ul style="list-style-type: none"> • Delivery devices include laser handpieces and micromanipulators • High peak pulsed laser energy to effectively cut and ablate lesions • Produces less postoperative pain and scarring
 <p>LUMENIS® NOVUS SPECTRA KTP AND ARGON LASERS</p>	<p>Versatile, efficient and compatible with a wide-array of delivery devices for a stapedectomy or mastoidectomy</p> <ul style="list-style-type: none"> • Innovative photo coagulator at 532nm • Extensive set of features that deliver power and reliability with proprietary advancements in diode pumped solid-state technology
 <p>Lumenis ACUpulse® DUO CO₂ Laser</p>	<p>Primarily used during stapedectomy, mastoidectomy, laryngoscopy, bronchoscopy, glossectomy or acoustic neuroma treatment</p> <ul style="list-style-type: none"> • The Digital AcuBlade Micromanipulator with SurgiTouch is a computerized scanner that delivers laser energy for shaped cutting and ablation to a precise size and depth. • Seamless alternation between the Free Beam and Flexible Fiber delivery modes in a single system to optimize patient care • FiberLase™ Drop In Guide (DIG) introduces the FiberLase™ CO₂ laser fiber to the surgical site and is used during robotically-assisted procedures • OtoLase Delivery System makes it ideal tool for delicate middle ear surgery and adequate treatment for small and auditory structures

PRODUCT	DESCRIPTION
 <p>AURA XP™ LASER THERAPY SYSTEM</p>	<p>Primarily used for a stapedectomy, laryngoscopies, photoangiolysis or acoustic neuroma treatment</p> <ul style="list-style-type: none"> • Vaporizes, cuts and coagulates simultaneously with minimal thermal spread to preserve adjacent healthy tissue
 <p>CLINICON® CO₂ LASER DELIVERY SYSTEM</p>	<p>Primarily used during a stapedectomy, mastoidectomy, laryngoscopy, bronchoscopy, glossectomy or acoustic neuroma treatment</p> <ul style="list-style-type: none"> • Delivers CO₂ laser energy through a thin flexible fiber without the need for coaxial gas cooling • Provides incision, excision, vaporization, ablation and coagulation of soft tissue • Superior beam profile and preserves TEM-00/Gaussian energy delivered to tissue for precise excisional capabilities
 <p>LUMENIS® HOLMIUM LASER (20, 30, 60 WATT)</p>	<p>Primarily used during arthroscopic surgery of the temporomandibular joint (TMJ)</p> <ul style="list-style-type: none"> • Precisely and rapidly resects cartilaginous tissue with minimal thermal spread • Utilizing special handpieces and optical fibers allows the laser energy to be transmitted to tissue within a saline environment
 <p>REVOLIX® 200 WATT THULIUM LASER</p>	<p>Primarily used during a laryngoscopy, bronchoscopy or glossectomy</p> <ul style="list-style-type: none"> • Produces a 2.0 micron wavelength for ideal tongue and soft tissue applications • Vaporizes, cuts and coagulates simultaneously with minimal thermal spread to preserve adjacent healthy tissue • Performs Transoral Robotic Surgery (TORS)

About Agiliti

Agiliti helps hospitals reclaim millions of dollars in wasted medical equipment. The company places equipment management experts and clinical engineers in more than 7,000 hospitals to ensure that the right equipment is in the right place at the right time. Onsite services free nurses and other clinicians to spend more time caring for patients and less time searching for the equipment they need. Agiliti also provides responsive rental services for a full range of equipment, including respiratory systems, infusion therapy devices, specialty beds and surgical lasers. A nationwide network allows the company to serve all health systems and hospitals across the U.S.
