Safety First:
Reduce Patient Falls and Resulting Injuries

The Impact of Patient Falls

Keeping patients safe is your priority. Keeping nursing staff and other caregivers safe is equally important. And yet, each year, over 700,000 patients in the United States fall in hospitals.[1] The cost of which exceeds $14,000[2] per fall with injury, and increases patient length of stay by six days.[3] Add to that a staff of dissatisfied caregivers who cannot easily access equipment and resources to manage fall risk patients, and costs are magnified through a loss of productivity and higher turnover.

Fall Management Solutions to Meet Your Needs

Agiliti can provide specialized fall management equipment and protocol support to help your organization reduce the frequency of patient falls and fall-related injuries, as well as mitigate the effects of those falls and injuries.

Fall Management Solution Options

Rental
- Just-in-time peak need rental
- Long-term rental agreements

Clinical Engineering Services
- Flexible, on-demand access to highly responsive and trained technicians.
- Available hourly, block-of-time or contracted.

About Agiliti

Agiliti helps hospitals reclaim millions of dollars in wasted medical equipment. The company places equipment management experts and clinical engineers in more than 7,000 hospitals to ensure that the right equipment is in the right place at the right time. Onsite services free nurses and other clinicians to spend more time caring for patients and less time searching for the equipment they need. Agiliti also provides responsive rental services for a full range of equipment, including respiratory systems, infusion therapy devices, specialty beds and surgical lasers. A nationwide network allows the company to serve all health systems and hospitals across the U.S. **For more information, visit agilitihealth.com.**
